Course Information

Course Title	AI Agents for Beginners (C690)
Course Reference	C690
Training Provider	Tertiary Infotech Academy Pte Ltd (UEN 201200696W)
Duration	1 day · 7.5 instructional hours · 8 clock hours including tea breaks
Daily Timing	9:00 am - 6:00 pm (1-hour lunch; two 15-minute tea breaks)
Mode	Instructor-led, concept-first learning with connected hands-on labs
Trainer	Course Trainer

Learning Outcomes

On completion of this course, learners will be able to:

- LO1: Explain how AI agents differ from chatbots and fixed workflows, including the roles of models, prompts, tools, memory, observations, and stop conditions.
- LO2: Compare conversational, task-based, and multi-agent patterns and select an appropriate no-code platform and bounded use case.
- LO3: Design an agent with a clear goal, instructions, persona, evidence boundary, tool permissions, output contract, and human escalation path.
- LO4: Build a simple no-code AI agent in n8n and ground its answers on an approved synthetic knowledge source.
- LO5: Connect a low-risk tool to an agent and control when the agent may calculate, recommend, refuse, or ask for human approval.
- LO6: Test and prepare an agent for deployment using expected-answer checks, safety cases, logging, monitoring, rollback, and continuous improvement.

Learning Reinforcement

- Every topic is followed by hands-on labs that learners complete on their own machine.
- Each lab ends with a 'Test it' verification step so learners can confirm their own progress.
- The trainer circulates during lab time to give individual feedback and unblock learners.
- Each topic closes with a recap mapped back to the course learning outcomes.

Course Schedule

Day 1 — Understand, design, build, test, and publish a bounded beginner AI agent

Time	Duration	Topic / Activity
9:00–9:20	20 min	Welcome, introductions, course outcomes, learning approach, and safe lab setup

Time	Duration	Topic / Activity
9:20–10:10	50 min	Topic 1 - Understanding AI Agents: chatbots, workflows, agents, models, prompts, tools, and memory
10:10–10:25	15 min	Tea break
10:25–11:10	45 min	Topic 1 - Agent patterns, use cases, platform choices, and bounded autonomy
11:10–12:00	50 min	Hands-on: Lab 1: Select a Use Case and Map the Agent
12:00–13:00	60 min	Topic 2 - Goals, GATES instructions, personas, evidence boundaries, and human ownership
13:00–14:00	60 min	Lunch break
14:00–14:50	50 min	Hands-on: Lab 2: Write and Test the Agent Instructions and Persona
14:50–15:15	25 min	Topic 2 - No-code architecture, document grounding, memory, tools, and permissions
15:15–15:30	15 min	Tea break
15:30–16:30	60 min	Hands-on: Lab 3: Build and Ground the No-Code Agent in n8n
16:30–16:55	25 min	Topic 2 - Testing, security, staged deployment, monitoring, and rollback
16:55–17:55	60 min	Hands-on: Lab 4: Add a Tool, Test the Boundaries, and Publish Safely
17:55–18:00	5 min	Learning-outcome recap and next steps

Total scheduled time: 480 minutes (8 hours) excluding lunch — of which 450 minutes (7.5 hours) are instructional, plus 30 minutes of tea breaks.

Lab Reference (aligned to course topics)

Topic	Coverage	Labs
Topic 01: Understanding AI Agents	1 of 4 labs (25%)	Lab 1
Topic 02: Building Your First AI Agents	3 of 4 labs (75%)	Lab 2, Lab 3, Lab 4
